

SMALL BUSINESS SOURCES SOUGHT NOTICE

Notice Number: HHS-NIH-NCI-SBSS-PCPSB- 45011-64

Title: Preclinical PREVENT Cancer Program: "Preclinical Efficacy and Intermediate Endpoint Biomarkers"

This is a Small Business Sources Sought notice. This is NOT a solicitation for proposals, proposal abstracts, or quotations. The purpose of this notice is to obtain information regarding: (1) the availability and capability of qualified small business sources; (2) whether they are small businesses; HUBZone small businesses; service-disabled, veteran-owned small businesses; 8(a) small businesses; veteran-owned small businesses; woman-owned small businesses; or small disadvantaged businesses; and (3) their size classification relative to the North American Industry Classification System (NAICS) code for the proposed acquisition. The NAICS code for this acquisition is 541711 - All Other Professional, Scientific, and Technological Services, which has a size standard of \$15,000,000.

Your responses to the information requested will assist the Government in determining the appropriate acquisition method, including whether a set-aside is possible. An organization that is not considered a small business under the applicable NAICS code should not submit a response to this notice.

Purpose and Objectives: Preclinical Efficacy and Intermediate Endpoint Biomarkers project within the Chemopreventive Agent Development Research Group (CADRG), Division of Cancer Prevention (DCP), National Cancer Institute (NCI) is seeking capability statements from all eligible Small Businesses as stated above, under NAICS Code 541711 (Research and Development in Biotechnology) with a size standard of 500 employees.

The NCI, CADRG/DCP is seeking contractors who demonstrate the ability to conduct studies to support the preclinical development of Preclinical Efficacy and Intermediate Endpoint Biomarkers.

This contract shall support the development of potential cancer preventive agents or vaccines employing detailed preclinical efficacy studies and determining pharmacodynamic efficacy, and biomarkers, which parallel the effectiveness of a given agent. The primary endpoint of the efficacy studies shall be to prevent the development of invasive cancers whereas the biomarker studies will identify endpoints which correlate with the effectiveness of a given preventive agent or vaccine. These endpoints might be measured in body fluids, normal or at risk tissue from the target or in histopathologically altered tissue from the target.
