This procurement is being solicited for award by SAIC-F under its contract #HHSN261200800001E for Operations and Technical support at the Frederick National Laboratory for Cancer Research, a federally funded research and development center. SAIC-F is the prime contractor charged with operations and technical support of the government owned contractor operated (GOCO) facility

SAIC-Frederick, Inc. is a wholly owned subsidiary of Science Applications International. The provisions and clauses contained herein and attached are influenced by and reflect the relationship of the parties in that Agreement, which was awarded and is administered under the provision of the Federal Acquisition Regulation (FAR).

### Description:

The scope of work under this Statement of Work (SOW) encompasses the activities needed to prospectively procure high quality, clinically annotated human tumor samples and when feasible, normal tissue from volunteer patients suffering from colon, ovarian, and breast cancer. The overall anticipated goal of the scope is to procure approximately 125 prospective tumor samples from each cancer type. Collection will discontinue once those thresholds are met. The tissue will be utilized for CPTAC Program Phase II with the samples obtained under conditions optimized for proteomic analysis.
