This procurement is being solicited for award by SAIC-F under its contract #HHSN261200800001E for Operations and Technical support at the Frederick National Laboratory for Cancer Research, a federally funded research and development center. SAIC-F is the prime contractor charged with operations and technical support of the government owned contractor operated (GOCO) facility

SAIC-Frederick, Inc. is a wholly owned subsidiary of Science Applications International. The provisions and clauses contained herein and attached are influenced by and reflect the relationship of the parties in that Agreement, which was awarded and is administered under the provision of the Federal Acquisition Regulation (FAR).

Description:

The scope of work under the Statement of Work (SOW) encompasses the activities to establish a core resource providing comprehensive logistical support for the CPTAC Program facilitating tissue sample and clinical data collection, histopathological analysis, storage, and internal dissemination. It is envisioned that the subcontractor will put in place a seamless pipeline for accepting clinical samples and associated data, preparing frozen-section slides for pathological analyses, storing the samples and

data, preparing DNA and RNA from the samples, distributing the tissue samples to the PCCs and the DNA/RNA to the GSC, and conveying the clinical and sample data to the DCC. It is further envisioned that the BCR will employ rigorous quality control and assurance practices for all aspects of the work. Finally, it is envisioned the BCR shall actively engage in routine communication regarding all aspects of the work with the CPTAC leadership, the other components of CPTAC, and SAIC-Frederick (SAIC-F).
